This manual includes information needed when starting up and also instructions for frequently used operations. The Advanced Manual is published on the web for ecological reasons and has more detailed information and advanced settings.

Advanced Manual found here
Features

- Equipped with 7 ch amplifier
- Supports playback in Dolby Atmos format which provides 360-degree placement and movement of sounds including overhead sound
- Supports playback in DTS:X, which is DTS's next-generation object-based surround sound technology that includes height to deliver a fully-immersive listening experience to your living room
- Dolby Surround listening mode expands 2 ch, 5.1 ch or 7.1 ch source to available speaker configurations
- THX Select2 Plus certified
- Equipped with 4K compatible HDMI IN/OUT jacks
- Equipped with 2 HDMI output jacks
- Supports the HDMI Standby Through function which allows signal transmission from players to the TV in standby state
- Supports HDCP2.2, a strict copy-protection for providing high quality content (HDMI IN1 to IN3/HDMI OUT MAIN/SUB)
- Supports ARC (Audio Return Channel)
- Supports USB storage playback
- Supports variety of network functions such as Internet Radio, DLNA, AirPlay etc.
- Supports Wi-Fi and Bluetooth®
- Equipped with a PHONO jack enabling connection with a turntable
- Bi-Amping capability
- A/V Sync Function to correct deviation of audio and video
- Multi-zone function which allows you to play a different source in another room from the main room
- 32 bit DSP (Digital Signal Processor) with excellent calculation performance
- Music Optimizer™ for compressed digital music files
- Phase Matching Bass System
- Automatic speaker setup available using supplied calibrated microphone (AccuEQ Room Calibration)
- Supports playback of MP3, WMA, WMA Lossless, FLAC, WAV, Ogg Vorbis, Apple Lossless, DSD, Dolby TrueHD via network and USB storage device (the supported formats will differ depending on the use environment

Refer to the back cover for supplied accessories.

Advanced Manual (on the web)

The Advanced Manual, published as an e-manual on the web, has more detailed information and advanced settings. The Advanced Manual is created in a format that makes it easy to read on a PC or Smartphone. The Advanced Manual has the following content:

- Details on AM/FM reception
- Playing Music Files on a USB Storage Device
- Listening to Internet Radio
- Playing Music with DLNA
- Playing Music Files in a Shared Folder
- Operating Music Files with the Remote Controller
- Advanced Settings (Setup Menu)
- Operating Other Components with the Remote Controller
- Advanced speaker connections
- Connecting and Operating Onkyo RI Components
- Firmware Update
- Troubleshooting
- Reference Information

Advanced Manual found here

En-2
Front Panel

① ON/STANDBY button: Turns the unit on or into standby mode.
② DOLBY ATMOS indicator: Lights when playing Dolby Atmos.
③ DTS:X indicator: Lights when playing DTS:X.
④ ZONE2 button: Controls the multi-zone function.
⑤ Remote control sensor: Receives signals from the remote controller.
⑥ OFF button: Switches the multi-zone function off.
⑦ Display
⑧ LISTENING MODE buttons: Allow you to select the listening mode.
⑨ DIMMER button (North American and Taiwanese models): Switches the brightness of the display.
⑩ RT/PTY/TP button (European, Australian and Asian models): Can be used when receiving the station transmitting text information.
⑪ MEMORY button: Registers a station.
⑫ TUNING MODE button: Switches the tuning mode.
⑬ DISPLAY button: Switches the information on the display.
⑭ SETUP button: Used when making settings.
⑮ Cursor buttons, TUNING button, PRESETTING button and ENTER button: Move the cursor and confirms the selection. When listening to AM/FM broadcasting, tune in to the station with TUNING or select the registered station with PRESET.
⑯ RETURN button: Returns the display to the previous state.
⑰ MASTER VOLUME: Allows you to adjust the volume.
⑱ MUSIC OPTIMIZER button/indicator (North American and Taiwanese models): Turns on/off the MUSIC OPTIMIZER function that improves the quality of the compressed audio.
⑲ PURE AUDIO button/indicator (European, Australian and Asian models): The display and analog video circuits are turned off to switch the unit to Pure Audio mode and provide purer sound.
⑳ PHONES jack: Stereo headphones with a standard plug are connected.
㉑ AUX INPUT HDMI jack: A HD camera or such other device is connected.
㉒ TONE and Tone Level buttons: Adjust the high tone and low tone.
㉓ Input selector buttons: Switch the input to be played.
㉔ SETUP MIC jack: The supplied speaker setup microphone is connected.
㉕ HYBRID STANDBY indicator: Lights if the unit enters standby mode when the HDMI Standby Through, USB Power Out at Standby, Network Standby or Wakeup from Bluetooth function is enabled.
Rear Panel

1. **RI REMOTE CONTROL jack**: An Onkyo product with RI jack can be connected and synchronized with this unit.
2. **TUNER AM/FM (75Ω) terminal**: The supplied antennas are connected.
3. **USB port**: A USB storage device is connected so that music files stored in it can be played. USB devices can be supplied with power when connected with a USB cable.
4. **COMPONENT VIDEO IN jack**: Component video input jack.
5. **ETHERNET port**: Used for LAN connection.
6. **VIDEO IN jacks**: Analog video signals are input.
7. **HDMI IN/OUT jacks**: Digital video signals and audio signals are transmitted between the unit and the connected devices.
8. **Wireless antenna**: Used for Wi-Fi connection or when using a Bluetooth-enabled device. Adjust their angles according to the connection status.

9. **SPEAKERS terminals**: Speakers are connected. To use the Multi-zone function, connect the speakers in the separate room to the ZONE2 speaker terminals.
10. **Power cord (North American, Australian and Asian models)**
    - **AC INLET (European and Taiwanese models)**: The supplied power cord is connected.
11. **DIGITAL IN COAXIAL/OPTICAL jacks**: Digital audio signals are input.
12. **GND terminal**: The ground wire of the turntable is connected.
13. **AUDIO IN jacks**: Analog audio signals are input.
14. **LINE OUT ZONE 2 jack**: Audio output jack connected to the pre-main amplifier for multi-zone playback in a separate room.
15. **PRE OUT SUBWOOFER jack**: A subwoofer with built-in amplifier is connected.

Display

1. Lights in the following conditions. "Z2": Zone 2 output is on. / "HDMI": HDMI signals are input and HDMI input selector is selected. / "ARC": Audio signals are input from ARC compatible TV and TV input selector is selected. / "3D": Input signals are 3D. / "USB" (\*): "NET" input is selected and USB storage device is connected. / "NET" (+): "NET" input is selected and the unit is connected to the network. / "DIGITAL": Digital signals are input and the digital input selector is selected. / Cursor indicators: NET or USB is controlled.
   - * "USB" and "NET" will flash if the connection is not correct.
2. Stays lit when headphones are connected.
3. Stays lit when NET or USB is controlled.
4. Lights according to the type of input digital signals and the listening mode.
5. Stays lit when Music Optimizer is enabled.
6. Lights in the following conditions. "AUTO": Tuning mode is auto. / ▶TUNED◀: Receiving AM/FM radio. ◀TUNED▶ flashes while tuning is automatically performed. / "FM STEREO": Receiving FM stereo. / "RDS" (European, Australian and Asian models): Receiving RDS broadcasting.
7. Flashes when muting is on.
8. Lights in the following conditions. "SLEEP": Sleep timer has been set. / "ASb" (Auto Standby): Auto Standby is on. / "ch": Channel is being set. / "Hz": Crossover frequencies are being set. / "m/ft": Speaker distances are being set. / "dB": Speaker volume is being set.
9. Displays various information of the input signals. Pressing DISPLAY displays the type of input digital signals and the listening mode.
Step 1: Connections

1 Connecting speakers

Speaker layout

Important: The power cord must be connected only after all other connections are completed.

Characteristics of speaker types

- 1 output front stereo sound and 2 output center sound such as dialogs and vocals. 3 create back sound field. 4 reproduces bass sounds and creates rich sound field.

Connecting 7, 8 speakers, 9, 10 speakers or 11, 12 speakers enables playback in 7.1 ch configuration. 7, 8 (back) speakers improve sense of envelopment created by back sound field as well as seamlessness of back sounds, providing more natural sound experiences in the sound field.

- 9, 10 or 11, 12 (height) speakers produce surround effects on a height plane. This unit can perform optimal sound field processing for the type of height speakers actually installed and registered in "Initial Setup".

Height speaker types

Installing speakers in ceiling

A Dolby Enabled Speaker is specially designed to be used as a height speaker. There are two types of Dolby Enabled Speakers; one type is designed to be placed on top of other speakers such as front speakers and surround speakers,

Dolby Surround listening mode. Install Top Front speakers so that they are positioned at a point between directly above the listening position and directly above the front speakers. Install Top Middle speakers so they are directly above the listening position. Install Top Rear speakers so they are positioned at a point between directly above the listening position and directly above the back speakers. You can select (a)(b), (c)(d) or (e)(f) on the unit. For connection with the unit, use the SPEAKERS BACK or HEIGHT terminals.

- Dolby Laboratories recommends placing the speakers as described in "Installing speakers in ceiling" to obtain the best Dolby Atmos effect.

Using Dolby Enabled Speakers
and the other type is designed to be integrated with normal speakers. Dolby Enabled Speakers placed with their diaphragms facing toward the ceiling create higher effect in the Dolby Atmos and Dolby Surround listening modes by providing sounds echoing off the ceiling. You can select (g) or (i) on the unit. For connection with the unit, use the SPEAKERS BACK or HEIGHT terminals.

When playing Dolby Atmos, the speakers required depend on how you have setup your back speakers or height speakers. The following shows combinations of speakers for reproducing Dolby Atmos.

*: Required, ○: Optional

Important:
Connect speakers with 4 Ω to 16 Ω impedance. You have to change the setting if any of the speakers have 4 Ω or more to less than 6 Ω impedance. Using a speaker with less impedance than the setting may result in failure. You can set up by viewing the guidance displayed on the TV screen. Select the item with the cursor buttons of the remote controller and press ENTER to confirm your selection. To return to the previous screen, press RETURN. Press RECEIVER and then SETUP on the remote controller. Select “2. Speaker” - “Configuration” - “Speaker Impedance” and change the default value from “6ohms” to “4ohms”.

A speaker configuration where only one back speaker is connected is not supported.
Instructions on how to connect speakers

Cut and remove the plastic coating from the end of the speaker cable, twist the core and connect it to the terminal. Be sure to make correct connection between the unit’s jacks and speaker’s jacks (+ to + and - to -) for each channel. If connection is wrong, a bass sound may become poor due to reverse phase. Up to two subwoofers with built-in power amplifier can be connected to the SUBWOOFER jacks. Set the cut-off filter selection switch of the subwoofer to DIRECT. If the subwoofer does not have a cut-off filter selection switch but has a cut-off frequency adjusting dial, turn it to the maximum frequency. If your subwoofer does not have built-in power amplifier, you can connect a power amplifier between the unit and the subwoofer.

● The speaker setting is 7.1 channels at the time of purchase. You can change it manually or by using automatic speaker setting.
● Short-circuiting the + cable and - cable or contacting the cable core to the rear panel of the unit may cause failure. Also do not connect two or more cables to one speaker terminal or one speaker to several terminals.

When using commercially available banana plugs: tighten the speaker terminals to the end and then insert the banana plugs. Do not insert the core of speaker cable directly into the hole for banana plug of speaker terminal. (North American models)
2 Connecting the TV and players

HDMI cable connection

The unit has many HDMI jacks on its rear panel and each of them corresponds to an input selector button of the same name on the front panel. For example, a Blu-ray Disc player will be connected to the HDMI IN1 jack and the BD/DVD button on the front panel will be used to listen to the playback sound (if the player is CEC compliant, input will be switched automatically when play is started). If you add another Blu-ray Disc player, you can use any other jack than HDMI IN1. It is possible to change assignment of the input jacks and input selector buttons. For how to make settings, see the Advanced Manual.

To connect the TV and the unit, connect the HDMI OUT MAIN jack of the unit and the HDMI IN jack of the TV using a HDMI cable. With this connection, it becomes possible to display the setting screen of the unit on the TV or transmit video/audio signals from the player to the TV. If your TV supports ARC (Audio Return Channel), it is possible to play the TV sound with the AV receiver’s speakers with this connection only. If your TV does not support ARC, you need, in addition to the HDMI OUT MAIN jack connection, a digital optical cable connection between the digital audio out optical jack of the TV and the DIGITAL IN OPTICAL jack of the unit or an analog audio cable connection between the audio output jack of the TV and the AUDIO IN TV jack of the unit.

Audio connection with a TV not supporting ARC

Select an appropriate connection for your TV.

The unit supports the HDMI Standby Through function that allows video and audio signal transmission from players to the TV even if the unit is in standby. You have to
modify the settings to enable the input selection link with CEC (Consumer Electronics Control) compliant device, connection with ARC compatible TV, and HDMI Standby Through function. See "2 Source Connection" of "Step 2: Initial Setup".

- Another TV can be connected to the HDMI OUT SUB jack.
- To enjoy HDCP2.2 protected video, connect the player to one of the HDMI IN1 to IN3 jacks and connect the unit and the TV via HDMI. You will be unable to view images protected by HDCP2.2 if your TV does not have a HDCP2.2 compatible input jack.
- To play 4K or 1080p video, use a high speed HDMI cable or high speed HDMI with Ethernet cable.

## Connecting Components without HDMI

If your AV component does not have HDMI Jack, use an available jack of your component for cable connection with this unit.

1. A player with a digital audio out jack can be connected.
   - Digital optical cable (OPTICAL)
     - As the digital in optical jack of the unit has a cover, push in the cable against the cover as it is turned inside.
   - Digital coaxial cable (COAXIAL)

2. A player with component video output jacks can be connected.
   - Component video cable
     - Its transmitted video has higher quality than that of composite video cable.

3. A player with a composite video output jack can be connected.
   - Composite video cable

4. A player with analog audio out jacks can be connected. When using jacks 2 and 3 for video input, connect to the audio input jacks corresponding to the jacks connected at 2 and 3. (For example, when video input connection is to the 2 BD/DVD jack, the audio input connection should also be to the 4 BD/DVD jacks.)
   - It is possible to change assignment of the input jacks and input selector buttons. For how to make settings, see the Advanced Manual.
   - To enjoy multi-zone playback with a player, connect player to either 1 or 4 jacks.
   - Analog audio (RCA) cable

5. Connect a turntable that uses an MM type cartridge and does not have a built-in audio equalizer. If the connected turntable has a built-in audio equalizer, connect it to the CD jack.
   - If it uses an MC type cartridge, install an audio equalizer compatible with MC type cartridge between the unit and the turntable by connecting it to the CD jack. For details, refer to the turntable’s instruction manual.
   - If the turntable has a ground wire, connect it to the GND terminal of this unit. If connecting the ground wire increases noise, disconnect it.

### Video upconversion function

Video signals input to the VIDEO IN jack or the COMPONENT VIDEO IN jacks will be upconverted to HDMI signals and then output from the HDMI output jack.

* When you upconvert video signals input to the COMPONENT VIDEO IN jacks and output them from the HDMI OUT jack, set the output resolution of the player to 480i or 576i. If the input has 480p/576p or higher resolution, a message prompting you to change the resolution setting will appear. If your player does not support 480i or 576i output, use the VIDEO IN jack.
* If multiple video signal inputs are put into one input system, HDMI signal output is prioritized.
Step 1: Connections

3 Other connections

AM/FM antenna connections
Connect the antennas to listen to AM/FM broadcast. When listening to the broadcast for the first time, adjust the antenna position and orientation to get the best reception.

- **AM loop antenna (supplied)**
- **Indoor FM antenna (supplied)**

**Assemble the AM loop antenna (supplied).**

**Fix with a tack on the wall.**

(North American and Taiwanese models)

(European, Australian and Asian models)

Network connection
You can enjoy Internet radio, DLNA and AirPlay by connecting the unit to LAN. The unit can be connected to the router with an Ethernet cable or to the wireless LAN router with Wi-Fi connection. In case of wired connection, connect the Ethernet cable to the Ethernet port. See "4 Network Connection" of "Step 2: Initial Setup" for Wi-Fi settings.

- **Internet radio**
- **Router**
- **NAS**

Headphones connection
Connect stereo headphones with a standard plug (1/4 inch or ø 6.3 mm) to the PHONES jack on the front panel. Sound from the speakers will be off while you are using the headphones.

- If you selected any other listening mode than Pure Audio (European, Australian and Asian models), Stereo, Mono and Direct, connecting headphones will switch the listening mode to Stereo.

Power cord
European and Taiwanese models include removable power cords. Connect the power cord to AC INLET of the unit and then connect to the outlet. Always disconnect the outlet side first when disconnecting the power cord. When the unit is turned on, a large instantaneous current may flow affecting functionality of the computer and other devices, so it is recommended to use a separate outlet.
Step 2: Initial Setup

"Initial Setup" automatically starts on the TV when you first turn the unit on.

Before Start
Setup is performed as a series of responses to questions asked by the unit. Select the item with the cursors of the remote controller and press ENTER to confirm your selection. To return to the previous screen, press RETURN.
- Switch the input on the TV to that assigned to the unit.

Settings proceed in the following order:

1 AccuEQ Room Calibration
- Automatic calibration for optimum speaker settings

2 Source Connection
- Checking that each input source is connected correctly
- HDMI link function settings

3 Remote Mode Setup
- Settings required to operate other AV Components with the Remote Controller

4 Network Connection
- Checking network connections
- Wi-Fi settings

* Firmware update notification: If the unit is connected via LAN and there is firmware update available, the "Firmware Update Available" message will appear. To execute updating, select "Update Now" with the cursor buttons of the remote controller and press ENTER.

When the screen above is displayed, before starting the procedure, place the supplied speaker setup microphone at the measurement position ∗ by referring to the following figure.

Correct measurement will not be possible if the microphone is held by hand. Measurement is not possible if headphones are being used.
The subwoofer sound may not be detected since it is extremely low frequencies. Set the subwoofer volume to around the half of its maximum volume.

Measurement may be interrupted if there is ambient noise or radio frequency interference. In this case, close the window and turn off the home appliance and fluorescent light.

2. After placing the microphone at the measurement position, select "Do It Now" with the cursors and press ENTER.

3. When "Please plug microphone that came in a box with AV receiver" is displayed, connect the microphone to the SETUP MIC jack of the unit.

4. Select the settings for the connected speakers, the type of the height speakers, and other appropriate settings.

When the screen above is displayed, set the items with the cursor buttons on the remote controller. Refer to the on-screen diagram for "Speaker Channels", which changes each time a different number of channels is selected. When all the items have been set, press ENTER on the remote controller. After that, follow the guidance displayed on the TV screen to operate the unit.

5. The test tones sound from the connected speakers and automatic speaker setting starts.

Measurement will be made 3 times or more for each speaker. It takes several minutes to be completed. Keep the room as quiet as possible during measurement. If any of the speakers do not produce the test tone, check for disconnection.

- During measurement, each speaker outputs the test tones at a high volume. Be careful of sound leak that may disturb your neighbors, or be careful not to frighten young children.

6. When the measurement is completed, the measurement result is displayed.

Press \[ \text{Enter} \] on the remote controller to check the settings. Press ENTER with "Save" selected. Select "On" in the next screen and press ENTER on the remote controller.

- You should normally select "On (All Channels)", and to disable just the front speakers, you should select "On (Except Front Left/Right)".

- If there is an error message, follow the on-screen instruction to remove the error cause. If the subwoofer was not detected, turn the volume of the subwoofer up to maximum and then select "Retry".

7. When "Please unplug setup microphone." is displayed, disconnect the microphone.

About THX playback

THX recommends setting the speakers manually if you use THX-certified speakers or playing back with THX listening modes.

- THX recommends setting the crossover frequency to "80Hz(THX)", manually.

- Due to the electrical complexities and the interaction with the room, you may notice irregular results when setting the level or distance of each speaker. If this happens, THX recommends setting the speakers and the subwoofer manually.

2 Source Connection

You can check the connections on the different inputs and make HDMI link function settings.

1. When the Source Connection start screen is displayed, select "Yes, Continue" with the cursors and press ENTER.

2. Select the desired input to check the connection and press ENTER.

Start playback of the selected device. If connection is correct, video/audio of the input source selected on the unit will be played.

3. After checking the connection, select "Yes" with the cursors and press ENTER.

- If you select "No" and press ENTER, the error cause will be displayed. Follow the guidance to remove the error cause and check the connection again.

4. Select "Yes" with the cursors and press ENTER on the remote controller to check the connection of other inputs or select "No, Done Checking" and press ENTER to skip.

If you select "Yes", you will return to the screen of step 2.

If you select "No, Done Checking", you will proceed to step 5.

5. Set the CEC link function.

Select "Yes" to enable the HDMI link function with CEC-compliant equipment, then select "Yes" again in the next screen.
Step 2: Initial Setup

The unit supports Wi-Fi connection with 2.4 GHz.

1. Select the method of Wi-Fi connection with the cursors and press ENTER.
   - **Scan Networks**: Use this unit to search for and connect to a wireless LAN router or other access point.
   - **Use iOS Device (iOS7 or later)**: Select this method to let this unit share the Wi-Fi settings with your iOS device and establish a Wi-Fi connection with ease.

2. If you selected "Scan Networks"

3. Select the SSID of the access point to be connected with the cursor buttons and press ENTER.
   - When the SSID of the access point appears on the TV screen, select the desired access point.

If you select "Yes", the connection with ARC compatible TV and HDMI Standby Through function will be enabled.

Remote Mode Setup

You can enable operation of the other components using the remote controller of the unit. When the Remote Mode Setup start screen is displayed, select "Yes, Continue" with the cursors and press ENTER on the remote controller. Follow the guidance to select the desired REMOTE MODE button and in the keyboard screen, enter the first three characters of the brand name of the device you are going to program and search for the remote control code. The guidance will also explain how to set the remote controller.

Network Connection

You can check the network connection and make the Wi-Fi setting. When the Network Connection start screen is displayed, select "Yes" with the cursors and press ENTER on the remote controller. If you select "Wired" in the next screen, you can view the LAN cable connection status. To make the Wi-Fi setting, select "Wireless", press ENTER on the remote controller and follow the sections below.

Make the following preparations.

Wi-Fi connection requires an access point such as wireless LAN router (+). Write down the SSID and password (key) of the access point if they are shown in the label of the main body. If the access point has an automatic setting button (may be called differently according to the manufacturer), you can set up without inputting the password. For how to use the automatic setting button of the access point, refer to its instruction manual.

1. **The unit supports Wi-Fi connection with 2.4 GHz access point.**

   If you changed the initial setting of the access point to skip password entry, step 3 is unnecessary.

   If you changed the initial setting of the access point to hide the SSID, see "When the access point is not displayed".

3. **Select and set the authentication method.**

   The "Enter Password" screen may be displayed automatically if the wireless LAN router does not have an automatic setting button.

   When this screen is displayed, select and set one of the three authentication methods: "Enter Password", "Push Button" and "PIN code". See below for details of and how to set each method.

   **Enter Password**: Enter the password of the access point to establish connection.
   1. Select "Enter Password" with the cursor buttons and press ENTER.
   2. Enter the password (+) on the keyboard screen, select "OK" with the cursor buttons and press ENTER.
      * Select "A/a" and press ENTER to toggle between upper and lower case. Select "-" or "_" and press ENTER to move the cursor to the selected direction. Select "X" and press ENTER to delete the character at the left of the cursor position. To select whether to mask the password with "*" or display it in plain text, press D on the remote control. Press +10 on the remote controller to switch between upper and lower case. Press CLR to delete all the input characters.
   3. If the security method of the access point to be connected is WEP, select "Default Key ID", select "OK" and press ENTER.

   **Push Button**: Use the automatic setting button of the access point to establish connection.
   1. Select "Push Button" with the cursor buttons and press ENTER.
   2. Hold down the automatic setting button of the access point for the necessary seconds, select "OK" with the cursor buttons and press ENTER.
### PIN code
Select this method when the automatic setting button of the access point is beyond the reach. Select "PIN code" with the cursor buttons and press ENTER to display the 8-digit PIN code. Register the displayed PIN code to the access point, select "OK" with the cursor buttons and press ENTER. For how to register the PIN code to the access point, refer to its instruction manual.

### 4. Select "Yes, Start to Check" in the network connection confirmation screen.

When the access point is not displayed
Select "Other..." with the ➤ cursor on the remote controller and press ENTER to display the keyboard screen. Input the SSID and password. Make the following settings according to the router setting.

- **WPA/WPA2 method**
  Select "WPA" or "WPA2" in "Security Method", select "OK" and press ENTER.

- **WEP method**
  Select "WEP" in "Security Method" and select "Default Key ID". Then select "OK" and press ENTER.

  - If encryption setting has not been made on the wireless LAN router, select "None" in "Security Method", select "OK" and press ENTER.

### If you selected "Use iOS Device (iOS7 or later)"

2. On the iOS device, go to "Settings"-"Wi-Fi" and turn on the setting, then select this unit in "SETUP NEW AIRPLAY SPEAKER".

3. Tap "Next".

4. Select "Yes, Start to Check" in the network connection confirmation screen.

### Privacy policy
A confirmation screen asking you to agree to the privacy policy is displayed during network setting. Select "Yes" and press ENTER to indicate agreement.

### When connection is successful
"Successfully Connected." is displayed on the screen.

If the screen is not displayed, try doing the setting again. If "Push Button" connection with the wireless LAN router does not work, try "Enter Password".

### Terminating initial setup
After finishing the initial setup, keep "Finished" selected and press ENTER on the remote controller. Connection and setting of the unit is now complete.

### Audio output of connected players
To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to "Bitstream output" on the connected Blu-ray Disc Player or other device. Depending on the settings on the Blu-ray Disc Player, there may be cases when Dolby TrueHD, Dolby Atmos, and DTS-HD Master Audio is not output according to the format of the source. In this case, in the Blu-ray Disc Player settings try setting "BD video supplementary sound" (or secondary sound) to "Off". Change the listening mode after changing the setting to confirm.

### Network Connection

- **LAN Interface**
  - IP Address: 192.168.1.123
  - Subnet Mask: 255.255.255.0
  - Gateway: 192.168.1.1
  - DNS Server: 8.8.8.8, 8.8.4.4

- **Gateway Ping**
  Successfully connected.

- **Internet Service Test**
  Successfully connected.

### Audio output of connected players
To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to "Bitstream output" on the connected Blu-ray Disc Player or other device. Depending on the settings on the Blu-ray Disc Player, there may be cases when Dolby TrueHD, Dolby Atmos, and DTS-HD Master Audio is not output according to the format of the source. In this case, in the Blu-ray Disc Player settings try setting "BD video supplementary sound" (or secondary sound) to "Off". Change the listening mode after changing the setting to confirm.
Step 3: Playing Back

### 1 Basic Operations

#### WHEN USING THE REMOTE CONTROLLER TO OPERATE THE AV RECEIVER

- The remote controller of this unit has the remote mode function for controlling other devices. You cannot control this unit when the remote controller is in the remote mode other than RECEIVER mode (for controlling this unit). Be sure to press 3 RECEIVER to select the RECEIVER mode before starting operation.

1. **Turning the power on.**
   - Press 1 RECEIVER on the remote controller to turn the power on.
   - Switch the input on the TV to that assigned to the unit. Use the TV's remote controller.

2. **Select the input on the unit.**
   - Press the 2 INPUT SELECTOR button for the player you want to listen to. Press TV to listen to the TV's sound. You can also use the input selector buttons on the main unit.
   - Input will automatically be selected if the TV or player is CEC compliant and connected to the unit with HDMI cable.

3. **Select the desired listening mode.**
   - After pressing 3 RECEIVER, press the 6 listening mode buttons to switch the mode so that you can enjoy different listening modes.

4. **Adjust the volume with 15 VOL.**

---

#### PART NAMES AND FUNCTIONS OF THE REMOTE CONTROLLER

- **RECEIVER:** Turns the unit on or into standby mode.
- **REMOTE MODE/INPUT SELECTOR buttons:** Switch the input to be played. Furthermore, by registering a particular remote control code to a button, you can switch the remote control mode to operate other equipment by pressing that button.
- **RECEIVER button:** Switches the remote controller to the mode for operating this unit.
- **Cursor buttons and ENTER button:** Move the cursor and confirms the selection.
- **SETUP button:** Displays the screen for making various settings for this unit.
- **Listening mode buttons:** Allow you to select the listening mode.
  - MOVIE/TV button: You can select a listening mode suitable for movies and TV programs.
  - MUSIC button: You can select a listening mode suitable for music.
  - GAME button: You can select a listening mode suitable for games.
  - STEREO button: You can select a listening mode for stereo and all channel stereo sources.
- **DIMMER button:** Switches the brightness of the display.
- **ZONE2 button:** For use when the unit is connected with a pre-main amplifier or speakers in a separate room and sound is played there.
- **MUSIC OPT button:** Turns on/off the MUSIC OPTIMIZER function that improves the quality of the compressed audio.
- **MUTING button:** Temporarily mutes audio. Press again to cancel muting.
- **VOLUME buttons:** Allow you to adjust the volume. This button also cancels the muting.
- **RETURN button:** Returns the display to the previous state.
- **Q button:** Displays the Quick Setup menu that allows you to quickly access the frequently used setting items including sound quality adjustment.
- **DISPLAY button:** Switches the information on the display.

---

En-15
2 Network Functions

You can enjoy sources such as Internet radio by connecting the unit to a network. For details on the operation, see the Advanced Manual.

- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit. (European, Australian, Taiwanese and Asian models)

You can enjoy sources such as Internet radio by connecting the unit to a network. For details on the operation, see the Advanced Manual.

Press NET on the remote controller to display the NET TOP screen on the TV. Select the item with the cursors of the remote controller and press ENTER to confirm your selection.

- To return to the previous screen, press RETURN.
- Available services may vary depending on your area of residence.

Press NET on the remote controller to display the NET TOP screen on the TV. Select the item with the cursors of the remote controller and press ENTER to confirm your selection.

- To return to the previous screen, press RETURN.
- Available services may vary depending on your area of residence.

3 AirPlay®

You can wirelessly enjoy music files stored on an iPhone®, iPod touch®, or iPad®. You can also play back music files on the computer with iTunes.

**Important**: This unit needs to be connected to the network through the same router as the iOS terminal or PC.

**Playing music files from an iPhone, iPod touch, or iPad**

1. Press NET on the remote controller.
2. Tap the AirPlay icon, select this unit from the list of devices displayed, and click "Done".

**Playing music files from a computer**

- AirPlay is compatible with iTunes 10.2 or later.
1. Press NET on the remote controller.
2. Turn on your computer and start iTunes.
3. Click the AirPlay icon of iTunes and select this unit from the list of devices displayed.
4. Play iTunes music files.

**Volume**: The volume of this unit and the AirPlay-enabled device are linked. Take care that the volume does not become too loud when you adjust the volume on the AirPlay-enabled device. You may damage the unit or the speakers. Stop play on the AirPlay-enabled device immediately if the volume becomes too loud at any point.

- The AirPlay icon is displayed in the control center if you are using iOS 7 and later. To display the control center, swipe from the bottom of the screen of the iOS device.
- If the AirPlay icon is not displayed, confirm that this unit and the iOS device are both connected to the router correctly.

3. Play music files from an iPhone, iPod touch, or iPad.

- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit. (European, Australian, Taiwanese and Asian models)
Step 3: Playing Back

Bluetooth

You can wirelessly enjoy music files stored in a smartphone or other Bluetooth-enabled device. The coverage area is 48 feet (15 meters).

- The Bluetooth-enabled device needs to support the A2DP profile.
- Note that connection is not always guaranteed with all Bluetooth-enabled devices.

Pairing

Pairing is necessary when connecting the Bluetooth-enabled device for the first time. Before starting the procedure, learn how to enable the Bluetooth setting function and to connect with other devices on the Bluetooth-enabled device.

1. Press BLUETOOTH on the remote controller.
   The unit begins pairing and “Now Pairing...” is displayed.

2. While “Now Pairing...” is on the display, complete connection on the Bluetooth-enabled device in the nearby area within about 2 minutes.
   If the name of this unit is displayed on the Bluetooth-enabled device’s display, select this unit. Paring will end after a short time.
   - If a password is requested, enter “0000”.
   - You can pair with another Bluetooth-enabled device by pressing and holding the BLUETOOTH button until “Now Pairing...” is on the display. This unit can store the data of up to 8 paired devices.

Playing Bluetooth-enabled devices

If the unit is on and the Bluetooth-enabled device is connected, the input will be automatically switched to BLUETOOTH. Play music in this state.

- It may take about a minute until connection is established when the unit is on since the Bluetooth function takes some time to start up.
- If the volume setting on the Bluetooth-enabled device is low, the sound will not be output from this unit.
- Due to the characteristics of Bluetooth wireless technology, the sound produced on this unit may slightly be behind the sound played on the Bluetooth-enabled device.
- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit. (European, Australian, Taiwanese and Asian models)

AM/FM Radio

The Basic Manual explains the method using automatic tuning. For manual tuning, see the Advanced Manual.

1. Press TUNER on the main unit several times to select either “AM” or “FM”.
2. Press TUNING MODE on the unit, so that the “AUTO” indicator on the display lights.
3. Press TUNING on the unit.
   The automatic tuning to a radio station starts. Searching stops when one is tuned. When tuned into a radio station, the “TUNED” indicator on the display lights. The “FM STEREO” indicator lights if the radio station is an FM radio station.

   ! Actual display varies depending on the country or the region.

   FM 87.5 MHz –
   FM STEREO

Registering a radio station: You can register up to 40 of your favorite AM/FM radio stations.

1. Tune into the AM/FM radio station you want to register.
2. Press MEMORY on the unit so that the preset number on the display flashes.
3. Press PRESET on the unit several times to select a number between 1 and 40 while the preset number is flashing (about 8 seconds).
4. Press MEMORY again on the main unit to register the station.
   When registered, the preset number stops flashing. To select a preset radio station, press PRESET.

AM/FM frequency step setting

It may be necessary for you to change the frequency step to tune the radio in your area. Change the step with the following procedure. Note that when this setting is changed, all radio presets are deleted.

1. After pressing RECEIVER on the remote controller, press SETUP.
2. Use the cursor buttons to select “6. Hardware” and press ENTER.
3. Select “Tuner” with the cursor and press ENTER.
4. Select “AM / FM Frequency Step” (North American and Taiwanese models) or “AM Frequency Step” (European, Australian and Asian models) with the cursor and select the frequency step for your area.

(For Taiwanese models only)

The setting is “10 kHz / 0.2 MHz” at the time of purchase. Please change it to “9 kHz / 0.05 MHz”.

on the main unit or CH +/- on the remote controller.

To delete a preset station, after selecting the preset number you want to delete with PRESET on the main unit, press TUNING MODE while holding down MEMORY on the main unit. When the preset number is deleted, it disappears from the display.

En-17
6 Multi-zone

You can listen to audio in a room (called Zone 2) other than the one where this unit is located (called the main room).

**Sources you can playback**
- External players
- NET
- Bluetooth
- AM/FM Radio

**Important:** Connection with external players
To listen to a player in Zone 2, you must connect using an RCA cable, a digital optical cable (OPTICAL), or a digital coaxial cable (COAXIAL). Some players may require audio output setting.

**Making Multi-zone Connection**
There are the following two methods of connection:

**a. Connecting with a pre-main amplifier in a separate room**
It is possible to play 2 ch source in a separate room while 7.1 ch source is being played in the main room. Connect the LINE OUT ZONE2 jacks of the unit and the line-in jacks of the pre-main amplifier in a separate room with an RCA cable.

- The volume should be adjusted with the pre-main amplifier used in the separate room.

**b. Connecting with speakers in a separate room**
Connect the speakers in another room to the SPEAKERS ZONE2 jacks of the unit using speaker cables. Note that 5.1 ch will be the maximum in the main room during Zone 2 playback. No sound will be output from the back speakers and height speakers.

* In this case, the Dolby Atmos listening mode cannot be selected.

These settings are required:
After connecting the speakers, press RECEIVER and then SETUP on the remote controller, select “2. Speaker” - “Configuration” and set “Powered Zone2” to “Yes”.

- Adjust the volume on this unit. To adjust the volume, press ZONE2 on the remote controller and then adjust with VOL. To control on the main unit, press ZONE 2 and within 8 seconds, adjust with the MASTER VOLUME control. You can mute the sound by pressing MUTING on the remote controller.
Performing Multi-zone Playback

It is possible to perform playback in the main room and a separate room at the same time, for example by playing the Blu-ray Disc player in the main room where the unit is placed while playing Internet radio in a separate room. It is also possible to perform playback only in a separate room.

- With external players, it is possible to play the same source or different sources in the main room and separate room.
- With "NET" and "BLUETOOTH", you cannot select different inputs for the main room and separate room. For example, if "NET" has been selected in the main room and then "BLUETOOTH" is selected as playback source in the separate room, the input in the main room will change to "BLUETOOTH" accordingly.
- When listening to AM/FM broadcasting, you cannot select different stations for the main room and separate room. Therefore broadcasting of the same station will be heard in the both rooms.

Playing Back

1. Press ZONE2 on the remote controller, point the remote controller at the main unit and press \^{O}RECEIVER. “Z2” lights on the main unit display and the multi-zone function is enabled. (Zone 2 is now on.)

2. Press ZONE2 again on the remote controller and press INPUT SELECTOR of the input to be played in a separate room.
   - If you turn the unit to standby during multi-zone playback, the ZZ indicator is dimmed and the playback mode is switched to playback in a separate room only. Performing steps 1 and 2 while the unit is in standby also switches the playback mode to playback in a separate room only. To play the same source in the main room and separate room, hold down ZONE2 for approximately 3 seconds.

To control on the main unit: press ZONE2 and within 8 seconds, press the input selector button of the source to be played in the other room. (To play the same source in the main room and separate room, press ZONE2 twice.)

To turn off the function

After pressing ZONE2 on the remote controller, press \^{O}RECEIVER. Alternatively press OFF on the main unit.

- If ZONE 2 is on, power consumption during standby becomes larger than normal.
- If ZONE 2 is turned on when the listening mode of the main room is Pure Audio, it will automatically switch to the Direct listening mode. (European, Australian and Asian models)
- While ZONE 2 is on, the RI linked system function (interlink between Onkyo components) is disabled.
- Pressing INPUT SELECTOR on the remote controller while you are using the remote controller for Zone 2 will switch the controlled target to the main room. To control Zone 2 again, press the ZONE2 button to enter the Zone control mode.

Quick Setup Menu

You can perform common settings on the TV screen while playing.

1. Press Q on the remote controller. The Quick Setup menu is displayed on the connected TV's screen.

   Quick Setup Menu

   ![Quick Setup Menu](image)

   - MOVIE/TV
   - MUSIC
   - GAME
   - THX

2. Select the item with the cursors of the remote controller and press ENTER to confirm your selection.
   - To return to the previous screen, press RETURN.

3. Select the setting with the cursors buttons of the remote controller.

   - Listening Mode: Select the listening mode from the categories of "MOVIE/TV", "MUSIC", "GAME" and "THX.
   - It cannot be set when audio is played from the TV's speakers.

   - Audio: You can perform various audio settings including audio quality and speaker level adjustment.
   - You cannot select this item when audio is output from the TV's speakers.

   - Bass, Treble: Adjust volume of the front speakers.
   - It cannot be set if the listening mode is Pure Audio (European, Australian and Asian models), Direct or THX.

   - Phase Matching Bass: Suppress phase shift in the midrange to enhance bass sound. Thus smooth and powerful bass sound can be obtained.
   - Center Level, Subwoofer Level: Adjust the speaker level while listening to the sound. The adjustment you made will be reset to the previous status when you turn the unit to standby mode.
   - Changes may not be possible depending on the settings in speakers.
   - This setting is not possible during MUTING or when using headphones.

   - A/V Sync: If the video is behind the audio, you can delay the audio to offset the gap. Different settings can be set for each input selector.
   - It cannot be set if the listening mode is Pure Audio (European, Australian and Asian models) or Direct.

   - AccuEQ Room Calibration: Enable or disable the settings made by automatic speaker setting. To enable them, you should normally select "On (All Ch)", and to disable just the front speakers, you should select "On (ex. L/R)". The setting can be separately set to each input selector.
   - This setting cannot be selected if the automatic speaker setting has not been performed.
   - It cannot be set if headphones are connected or the listening mode is Pure Audio (European, Australian and Asian models) or Direct.

Equalizer: Assign the equalizer settings adjusted in
Step 3: Playing Back

"Setup" -> "2. Speaker" -> "Equalizer Settings" to "Preset1" to "Preset3". The same sound field setting is applied to all ranges when set to "Off".

- It cannot be set if the listening mode is Pure Audio (European, Australian and Asian models) or Direct.

**Music Optimizer**: Improve the quality of the compressed audio. Playback sound of lossy compressed files such as MP3 will be improved. The setting can be separately set to each input selector.
- The setting is effective in the signals of 48 kHz or less. The setting is not effective in the bitstream signals.
- It cannot be set if the listening mode is Pure Audio (European, Australian and Asian models) or Direct.

**Late Night**: Make small sounds to be easily heard. It is useful when you need to reduce the volume while watching a movie late night. You can enjoy the effect only with Dolby Digital, Dolby Digital Plus, Dolby TrueHD, and DTS sources.
- Turning the unit to standby mode will set the setting to "Off". In case of Dolby TrueHD, the setting will be set to "Auto".
- The setting cannot be used in the following cases:
  - If "Loudness Management" is set to "Off" when playing Dolby Digital Plus or Dolby TrueHD.
  - When the input signal is DTS and "Dialog Control" is other than 0 dB.

**Re-EQ, Re-EQ(THX)**: Adjust the soundtrack that was processed to enhance its treble, in order to make it suitable for home theater.
- This function can be used in the following listening modes: Dolby Digital, Dolby Digital Plus, Dolby TrueHD, Multichannel, DTS, DTS-ES, DTS 96/24, DTS-HD High Resolution Audio, DTS-HD Master Audio, DTS Express, DSD.
- In Re-EQ(THX), the following listening modes can be used: THX Cinema, THX Surround EX, and THX Select2 Cinema.

**Center Spread**: Adjust the width of the sound field of the front channel when playing in the Dolby Surround listening mode.
To spread the width of the sound field to the left and right, set to "On". To concentrate sound in the center, set to "Off".
- This setting may be "Off" depending on the settings in speakers.

**Dialog Control**: You can increase the dialog portion of the audio in 1 dB steps up to 6 dB so that you can make dialog easier to hear over background noise.
- This setting is unavailable for content other than DTS:X.
- This setting may not be available for selection with some content.

**HDMI**: Select the HDMI OUT jack to be used for output.

**Information**:

**Audio**: Displays the audio input source, format, number of channels, sampling frequency, listening mode, and number of output channels.

**Video**: Displays information such as the video input source, resolution, color space, color depth, 3D information, Aspect and output.

**Tuner**: Displays information such as the band, frequency, and preset number. This is displayed only when "TUNER" is selected as the input source.

8 Other useful functions

To adjust the sound quality
It is possible to enhance or moderate the bass and treble of front speakers. Press TONE on the main unit several times to select the desired setting from "Bass", "Treble" and "Phase Matching Bass", and adjust with +/-. It cannot be set if the listening mode is Pure Audio (European, Australian and Asian models), Direct or THX.

- "Bass": Allows you to enhance or moderate the bass.
- "Treble": Allows you to enhance or moderate the treble.
- "Phase Matching Bass": Allows you to keep the clear midrange and effectively enhance the bass.

Checking the Input Format
Press DISPLAY on the remote controller several times to switch the display of the main unit in order of:

<table>
<thead>
<tr>
<th>Input source &amp; volume</th>
<th>BD/DVD</th>
<th>25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Listening mode</td>
<td>Stereo</td>
<td></td>
</tr>
<tr>
<td>Signal format</td>
<td>Dolby D 5.1</td>
<td></td>
</tr>
<tr>
<td>Sampling frequency</td>
<td>fs: 48kHz</td>
<td></td>
</tr>
<tr>
<td>Input signal resolution</td>
<td>1080p/60 16:9</td>
<td></td>
</tr>
</tbody>
</table>

- If "Dolby D 5.1" is displayed in Signal format, the Dolby Digital 5.1 ch signals are being input. When listening to AM/FM radio, the band, frequency and preset number are displayed.

Playing Audio and Video from Separate Sources
It is possible to play audio and video from different sources. For example, you can play audio from the CD player and video from the BD/DVD player. In this case, press BD/DVD and then CD. Then start playback on the BD/DVD player and CD player. This function is effective when an input with audio only has been selected (CD, NET, BLUETOOTH, TUNER or PHONO in the initial setting). (*)
- When NET or BLUETOOTH is selected, press MODE on the remote controller after pressing NET or BLUETOOTH on the remote controller.
Troubleshooting

Before starting the procedure
Problems may be solved by simply turning the power on/off or disconnecting/connecting the power cord, which is easier than working on the connection, setting and operating procedure. Try the simple measures on both the unit and the connected device. If the problem is that the video or audio is not output or the HDMI linked operation does not work, disconnecting/connecting the HDMI cable may solve it. When reconnecting, be careful not to wind the HDMI cable since if wound the HDMI cable may not fit well. After reconnecting, turn off and on the unit and the connected device.

The AV receiver turns off unexpectedly.
- The AV receiver will automatically enter standby mode when Auto Standby or Sleep Timer is set and launched.
- The protection circuit may have been activated. If this is the case, when you turn the unit on again, “AMP Diag Mode” will appear on the main unit’s display. The unit will then enter a mode that detects abnormal conditions. If no problems are detected, “AMP Diag Mode” will disappear and the unit will return to a normal state. If “CHECK SP WIRE” appears on the display, the speaker cables may be short-circuited. Turn the unit off, and check to see if the cable core of any of the speaker cables is in contact with that of another speaker cable or with the rear panel. After that, turn the unit on again. If “NG” appears, unplug the power cord immediately and contact your Onkyo dealer.

There’s no sound, or it’s very quiet.
- A wrong input selector button has been selected. Select a correct input for the player. Also check that muting is not on.
- Not all listening modes use all speakers.

There’s no picture.
- A wrong input selector button has been selected.
- Video from the analog input is not displayed if the listening mode is Pure Audio. (European, Australian and Asian models)
- To display video from the connected player on the TV screen while the unit is in standby, you need to enable HDMI Standby Through function.
- When the TV image is blurry or unclear, power cord or connection cables of the unit may have interfered. In that case, keep distance between TV antenna cable and cables of the unit.
- If you connect a player supporting HDCP2.2, be sure to connect it to one of the HDMI IN1 to IN3 jacks of the unit.
- Do not unplug the power cord until “Clear” disappears from the display.

Video and audio are out of synch.
- Video may be delayed relative to audio depending on the settings and connections with your TV. Adjust in “Step 3: Playing Back”, “7 Quick Setup Menu”, “A/V Sync”.

Cannot play digital surround.
- To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to “Bitstream output” on the connected Blu-ray Disc Player or other device.

Cannot output audio such as Dolby Atmos according to the format of the source.
- If you cannot output audio according to the format of the source (Dolby TrueHD, Dolby Atmos, DTS-HD Master Audio, etc.), in the Blu-ray Disc Player settings try setting “BD video supplementary sound” (or secondary sound) to “Off”. Change the listening mode for each source after changing the setting to confirm.

HDMI control does not function correctly.
- Set the CEC link function of the unit to on. It is also necessary to make the HDMI linked system setting on the TV. See the TV’s instruction manual for details.

Cannot access to network.
- Try plugging/unplugging the unit or the wireless LAN router or check their power-on status. This will work well in many cases.
- If the desired wireless LAN router is not in the access point list, it may be set to hide SSID or the ANY connection may be off. Change the setting and try again.

Resetting the unit
Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset.

How to reset:
1. While holding down CBL/SAT on the main unit (note that step 2 must be performed with this button pressed down)
2. Press ON/STANDBY on the main unit (“Clear” appears on the display and the unit returns to standby).

Precautions

For European Models

Declaration of Conformity

We declare, under our sole responsibility, that this product complies with the essential requirements and other relevant provisions of Directive 1999/5/EC.

- Safety
- Limits and methods of measurement of radio disturbance characteristics
- Limits for harmonic current emissions
- Limitation of voltage changes, voltage fluctuations and ficker
- RoHS Directive, 2011/65/EU

Hereby, Onkyo Corporation, declares that this TX-NR747 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Cet appareil, déclaré par Onkyo Corporation, est conforme aux exigences essentielles et autres exigences pertinentes de la Directive 1999/5/EC.

Onkyo Corporation declares that this TX-NR747 is in conformity with the essential requirements and other relevant provisions of Directive 1999/5/EC.

En-24
License and Trademark Information

DOLBY
Manufactured under license from Dolby Laboratories. Dolby, Dolby Atmos, Dolby Surround, Surround EX and the double-D symbol are trademarks of Dolby Laboratories.

DTS
For DTS patents, see http://patents.dts.com. Manufactured under license from DTS, Inc. DTS, the Symbol, DTS in combination with the Symbol, the DTS-HD logo, and DTS-HD Master Audio are registered trademarks or trademarks of DTS, Inc. in the United States and/or other countries. © DTS, Inc. All Rights Reserved.

THX
THX Select2 Plus
Manufactured under license from THX Ltd. THX and the THX logo are registered in the U.S. and other jurisdictions. All rights reserved. Surround EX is a trademark of Dolby Laboratories. Used with permission. U.S. Pat. nos. 7,254,239 & 7,693,033 & 7,974,425 & 8,452,028 & 8,509,457 Taiwan Pat. B38671 European Pat. 1,360,874

THX Select2 Plus
Before any home theater component can be THX Select2 Plus certified, it must pass a rigorous series of quality and performance tests. Only then can a product feature the THX Select2 Plus logo, which is your guarantee that the Home Theater products you purchase will give you superb performance for many years to come. THX Select2 Plus requirements define hundreds of parameters, including power amplifier performance, and pre-amplifier performance and operation for both digital and analog domains. THX Select2 Plus receivers also feature proprietary THX technologies (e.g., THX Mode), which accurately translate movie soundtracks for home theater playback.

Re-Equalization and the “Re-EQ” logo are trademarks of THX Ltd.

HDMI
The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

Wi-Fi CERTIFIED
The Wi-Fi CERTIFIED Logo is a certification mark of the Wi-Fi Alliance®, including the wireless symbol.

Dolby
Made for iPod, iPhone, and iPad
AirPlay, iPod, iPhone, and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.
iPad Air and iPad mini are trademarks of Apple Inc.

“Made for iPod”, “Made for iPhone” and “Made for iPad” mean that an electronic accessory has been designed to connect specifically to iPod, iPhone, or iPad, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

Please note that the use of this accessory with iPod, iPhone or iPad may affect wireless performance.

AirPlay works with iPhone, iPad, and iPod touch with iOS 4.3.3 or later, Mac with OS X Mountain Lion or later, and PC with iTunes 10.2.2 or later.

Apple, Apple TV and Safari are trademarks of Apple Inc., registered in the U.S. and other countries.

Bluetooth
The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Onkyo is under license. Other trademarks and trade names are those of their respective owners.

Onkyo does not guarantee Bluetooth compatibility between the AV receiver and all Bluetooth-enabled devices.

For compatibility between the AV receiver and another device with Bluetooth technology, consult the device’s documentation and dealer. In some countries, there may be restrictions on using Bluetooth devices. Check with your local authorities.

SiriusXM
SIRIUS, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries. All rights reserved.

DLNA®, the DLNA Logo and DLNA CERTIFIED® are trademarks, service marks, or certification marks of the Digital Living Network Alliance.

This product is protected by certain intellectual property rights of Microsoft. Use or distribution of such technology outside of this product is prohibited without a license from Microsoft.

Windows and the Windows logo are trademarks of the Microsoft Group of companies.

The QR Code is a registered trademark of DENSO WAVE INCORPORATED.

“x.v.Color” is a registered trademark of Sony Corporation.

DSD and the Direct Stream Digital logo are trademarks of Sony Corporation.

MPEG Layer-3 audio coding technology licensed from Fraunhofer IIS and Thomson.

AccuEQ, Music Optimizer, RIHD and WRAT are trademarks of Onkyo Corporation.

“*All other trademarks are the property of their respective owners.”

DISCLAIMER
Through this device you are able to link to other services or websites which are not under the control of any company which has designed, manufactured or distributed/have distributed this device, and its affiliates (collectively, “Company”). We have no control over the nature, content and availability of those services. The inclusion of any links does not necessarily imply a recommendation or endorse the views expressed within them.

All information, content and services available through this device belong to third parties and are protected by copyright, patent, trademark and/or other intellectual property laws of applicable countries.

The information, content and services provided through this device are for your personal, noncommercial use only. Any information, content or services may not be used in any manner other than previously approved by the appropriate content owner or service provider.

You may not modify, copy, republish, translate, exploit, create derivative works, upload, post, transmit, sell or distribute in any manner any information, content or services available through this device, unless expressly permitted by the appropriate copyright, patent, trademark and/or other intellectual property owner, including, without limitation, content owner or service provider.

THE CONTENT AND SERVICES AVAILABLE THROUGH THIS DEVICE ARE PROVIDED “AS IS”.

COMPANY DOES NOT WARRANT INFORMATION, CONTENT OR SERVICES SO PROVIDED, EITHER EXPRESSLY OR IMPLIEDLY, FOR ANY PURPOSE.

COMPANY EXPRESSLY DISCLAIMS ANY WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

Company makes no representation or warranty of any kind, express or implied, about the completeness, accuracy, validity, legality, reliability, suitability or availability with respect to the information, content or services available through this device. Company shall not be liable, whether in contract or tort, including negligence and strict liability, for any direct, indirect, special, incidental or consequential damages or any other damages arising out of, or in connection with, any information contained in, or as a result of the use of any content or service by you or any third party, even if Company has been advised of the possibility of such damages, nor shall Company be liable for any third party claims against users of this device or any third party.

In no event shall Company be responsible nor liable for, without limiting the generality of the foregoing, any interruption or suspension of any information, content or service available through this device. Company is neither responsible nor liable for customer service related to the information, content and services available through this device. Any question or request for service relating to the information, content or services should be made directly to the appropriate content owners and services providers.
Others
This license is designed to be compatible with copyright laws. As a consequence, it is not designed to address all situations that may arise in practice. For example, it does not address the situation where a user plugs a floppy disk containing the source code into a network-based system. It is intended to be compatible with copyright laws and to help you avoid inadvertently violating laws. If you have any doubts about what constitutes a violation of copyright laws, you are advised to seek legal advice.

The license has two main sections:

1. The terms of the license.
2. The definition of the source code.

The terms of the license are designed to allow free distribution of software as long as the software is distributed in a medium customarily used for software interchange; or (2) a work derived from the original by one or more individuals as a work based on the Program, and the Program itself is therefore treated as a work based on its original version. The license is designed to be compatible with the copyright laws of many countries. It is not designed to address all situations that may arise in practice. For example, it does not address the situation where a user plugs a floppy disk containing the source code into a network-based system. It is intended to be compatible with copyright laws and to help you avoid inadvertently violating laws. If you have any doubts about what constitutes a violation of copyright laws, you are advised to seek legal advice.

Titles, "Publisher" means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is distributed.

"Contributors" means an individual, the laws of location of the principal place of residence of the Author.

"Contributor" means any individual, firm, corporation, or other entity that of

"Software" means the full source code, build system, and documentation as well as the executables and derived source code provided as part of the Software distribution.

"Author" means the individual or entity that creates, develops, modifies, owns and/or publishes the Work.

"This License" means the Code Project Open License described above.

"Author License" means the license that the Author may grant to You.

"Contributor License" means the license that Contributors may grant to You.

"Contribution" means any work of authorship, including any modifications or additions to the Work or derivative works created from the Work.

"This work" refers to the full source code, build system, and documentation as well as the executables and derived source code provided as part of the Software distribution.

"Permissive Software" means any software distributed as open-source or public-domain software.

"Derivative Work" means any work of authorship, including any modifications or additions to the Work or derivative works created from the Work.

"Licensed Work" means any work of authorship, including any modifications or additions to the Work or derivative works created from the Work.

"Licensee" means any individual, firm, corporation, or other entity that of
Supplied Accessories

- Indoor FM antenna --- (1)
- AM loop antenna --- (1)
- Remote controller (RC-898M) --- (1)
- Batteries (AA/R6) --- (2)
- Power cord (European and Taiwanese models) --- (1)
- Speaker setup microphone --- (1)

* The number in parenthesis indicates the quantity. On packaging, the letter at the end of the product name indicates the color.

How to use the remote controller

- If you do not use the remote controller for a long time, remove the batteries to prevent leakage.
- Note that keeping consumed batteries inside may cause corrosion resulting in damage of the remote controller.
