This manual includes information needed when starting up and also instructions for frequently used operations. The Advanced Manual is published on the web for ecological reasons and has more detailed information and advanced settings.

Advanced Manual found here

Features

- Equipped with 7 ch amplifier
- Supports playback in Dolby Atmos format which provides 360-degree placement and movement of sounds including overhead sound
- Dolby Surround listening mode expands 2 ch, 5.1 ch or 7.1 ch source to available speaker configurations
- Equipped with 4K compatible HDMI IN/OUT jacks (To play 4K or 1080p video, use a high speed HDMI cable or high speed HDMI with Ethernet cable)
- Supports the HDMI Standby Through function which allows signal transmission from players to the TV in standby state
- Supports HDCP2.2, a strict copy-protection for providing high quality content
- Supports Bluetooth connection
- Supports ARC (Audio Return Channel)
- Supports A/V Sync Function to correct deviation of audio and video
- Multi-zone function which allows you to play the same audio in another room as the main room
- 32 bit DSP (Digital Signal Processor) with excellent calculation performance
- Music Optimizer™ for compressed digital music files
- Phase Matching Bass System
- Automatic speaker setup available using supplied calibrated microphone (AccuEQ Room Calibration)
- Supports multi-language on-screen displays
- English, German, French, Spanish, Italian, Dutch, Swedish, Russian
- European, Australian and Asian models only
- European, Australian, Taiwanese and Asian models only
- OSD is not displayed when the input selector is “BLUETOOTH”. Use the display on the main unit when operating the unit.

Refer to the back cover for supplied accessories.

Advanced Manual (on the web)

The Advanced Manual, published as an e-manual on the web, has more detailed information and advanced settings. The Advanced Manual is created in a format that makes it easy to read on a PC or Smartphone. The Advanced Manual has the following content:

- Details on AM/FM reception
- Operating Music Files with the Remote Controller
- Using the Listening Modes
- Advanced Settings
- Operating Other Components with the Remote Controller
- Connecting and Operating Onkyo RI Components
- Troubleshooting
- Reference Information

Advanced Manual found here
Front Panel

1. **ON/STANDBY button**: Turns the unit on or into standby mode.
2. **BLUETOOTH indicator**: Flashes while pairing with a Bluetooth-enabled device is in progress and stays lit when pairing is completed.
3. **DOLBY ATMOS indicator**: Lights when playing Dolby Atmos.
4. **ZONE A and ZONE B buttons**: Control the multi-zone function.
5. **Remote control sensor**: Receives signals from the remote controller.
6. **DIMMER button (North American and Taiwanese models)**: Switches the brightness of the display.
7. **Cursor buttons, ▼TUNING▼ button, ◀PRESET▶ button and ENTER button**: Move the cursor and confirms the selection. When listening to AM/FM broadcasting, tune in to the station with ▼TUNING▼ or select the registered station with ◀PRESET▶.
8. **RETURN button**: Returns the display to the previous state.
9. **MASTER VOLUME**: Allows you to adjust the volume.
10. **MUSIC OPTIMIZER button**: Turns on/off the MUSIC OPTIMIZER function that improves the quality of the compressed audio.
11. **PHONES jack**: Stereo headphones with a standard plug are connected.
12. **TONE and Tone Level buttons**: Adjust the high tone and low tone.
13. **Input selector buttons**: Switch the input to be played.
14. **LISTENING MODE buttons**: Allow you to select the listening mode.
15. **AUX INPUT VIDEO/AUDIO jacks**: A video camera or such other device is connected.
16. **SETUP MIC jack**: The supplied speaker setup microphone is connected.
Rear Panel

1. **TUNER AM/FM (75Ω) terminal**: The supplied antennas are connected.

2. **to TV jack**: Connect to a TV using a HDMI cable. Change the input selector to "TV" to hear audio from the TV. If your TV does not support ARC, you need connection 1 in addition to this connection.

3. **BD/DVD jacks**: Connect to a Blu-ray Disc Player or DVD Player using a HDMI cable. This corresponds with the "BD/DVD" input selector.

4. **CBL/SAT jack**: Connect to a Cable Set-top box using a HDMI cable. This corresponds with the "CBL/SAT" input selector.

5. **GAME 1 jack**: Connect to a Game console using a HDMI cable. This corresponds with the "GAME 1" input selector.

6. **STRM BOX jack**: Connect to a Streaming Media Player. When a power supply is required, connect using a USB cable to the POWER OUT port. This corresponds with the "STRM BOX" input selector.

7. **Power cord (North American, European, Australian and Asian models)**
   - **AC INLET (Taiwanese models)**: The supplied power cord is connected.

8. **RI REMOTE CONTROL jack**: An Onkyo product with RI jack can be connected and synchronized with this unit.

9. **CD jack**: Connect to audio equipment such as a CD Player using a digital optical cable. This corresponds with the "CD" input selector.

10. **TV jack**: If your TV does not support ARC, you need to connect this jack to the audio output jack on the TV, in addition to connection 2. This corresponds with the "TV" input selector.

11. **GAME 2 jack**: Connect a game console that has component video jacks. This corresponds with the "GAME 2" input selector.

12. **VCR jacks**: Connect to a Video Cassette Recorder. This corresponds with the "VCR" input selector.

13. **SUBWOOFER jacks (ZONE A)**: A subwoofer with built-in amplifier placed in ZONE A is connected.

14. **SPEAKERS jacks (ZONE A)**: Speakers placed in ZONE A are connected. Up to 7 channels of speakers can be connected.

15. **SPEAKERS jacks (ZONE B)**: Speakers placed in ZONE B are connected. 2 channels of speakers can be connected.
Step 1: Connections

1. Connecting the TV and Players

Before Start
- Connect this unit between the TV and player.
- To select the source to play, select the input selector button with the same name as the jack to which it is connected. Input switches automatically when you have connected equipment that conforms to the CEC (Consumer Electronics Control) standard to this unit using a HDMI cable. ()
- This allows audio and video signal transmission from players to the TV even if this unit is in standby. (HDMI Standby Through function) ()
- The power cord must be connected only after all other connections are completed.
  * It is necessary to make appropriate settings to enable this function. See "3 HDMI Setup" of "Step 2: Setting Up".

Connection to TV
Connect the "to TV" jack and the HDMI IN jack of the TV with a HDMI cable. This is the only connection necessary with a TV that supports ARC. If your TV does not support ARC, you need to connect the "TV" jack to the audio output jack on the TV with a digital optical cable or an RCA cable, in addition to this connection to the "to TV" jack.
  * This function enables you to play the audio from the TV through the speakers of this unit just by connecting this unit and the TV with a single HDMI cable. To use the ARC function, connect to the ARC compatible HDMI jack of the TV and make appropriate settings on this unit. See "3 HDMI Setup" of "Step 2: Setting Up".

Audio connection with a TV not supporting ARC
  * Select an appropriate connection for your TV.

Cable used for connection (sold separately)
- HDMI cable
- Component video cable
- Composite video cable
- Digital coaxial cable
- Digital optical cable
- Analog audio (RCA) cable
Step 1: Connections

Connection with a player that has a HDMI jack

Connect to the "BD/DVD", "CBL/SAT", "GAME 1", and "STRM BOX" jacks using a HDMI cable. Connect the equipment to the corresponding jack, for example a Blu-ray Disc Player to "BD/DVD", so that it is easy for you when selecting with the input selector. Connect a Streaming Media Player to the "STRM BOX" jack. When a power supply is required, connect using a USB cable to the POWER OUT port. (+)

The POWER OUT jack supports a 5V/1A power supply.

Connection with a player that does not have a HDMI jack

Connect equipment with video output jacks to the "BD/DVD", "CBL/SAT", "GAME 2", and "VCR" jacks. Connect with component video cable or composite video cable for video signals and digital coaxial cable or RCA cable for audio signals.

Connect audio equipment such as a CD Player using a digital optical cable or an RCA cable to the "CD" jack.

- Video signals input to the component video input or the composite video input will be upconverted to HDMI signals and then output from the "to TV" jack. When upconverting video signals input to the component video input for output from the HDMI OUT jack, set the output resolution of the player to 480i or 576i. If the input has 480p/576p or higher resolution, a message prompting you to change the resolution setting will appear. If your player does not support 480i or 576i output, use the composite video jack.

- Connection with a digital coaxial cable or digital optical cable is necessary for playback of digital surround sources such as Dolby Digital. The digital in optical jack of the unit has a cover, push in the cable against the cover as it is turned inside.

2 Connecting the AM/FM Antenna

Connect the antennas to listen to AM/FM broadcast. When listening to the broadcast for the first time, adjust the antenna position and orientation to get the best reception.
Step 1: Connections

Characteristics of speaker types
1. Outputs front stereo sound such as dialogs and vocals.
2. Creates back sound field.
3. Reproduces bass sounds and creates rich sound field.
Connecting 7, 8, or 9, 10 speakers enables playback in 7.1 ch configuration. 7, 8 (back) speakers improve sense of envelopment created by back sound field as well as seamlessness of back sounds, providing more natural sound experiences in the sound field. 9, 10 (height) speakers produce surround effects on a height plane. Note that this unit can perform optimal sound field processing for the type of height speakers actually installed and registered in automatic speaker settings.

Height speaker types

Installing speakers in ceiling

Ceiling speakers, etc. are used for maximizing effects in Dolby Atmos or Dolby Surround listening mode. Install Top Front speakers so that they are positioned at a point between directly above the listening position and directly above the front speakers. Install Top Middle speakers so they are directly above the listening position. Install Top Rear speakers so they are positioned at a point between directly above the listening position and directly above the back speakers. You can select 8, 9, or 10 speakers and install speakers on the unit. For connection with the unit, use the SPEAKERS BACK/HEIGHT terminals.

Dolby Laboratories recommends placing the speakers as described in "Installing speakers in ceiling" to obtain the best Dolby Atmos effect.

Important:
Connect speakers with 6 Ω to 16 Ω impedance. Using a speaker with less impedance than the supported value may result in failure.
Using Dolby Enabled Speakers

A Dolby Enabled Speaker is specially designed to be used as a height speaker. There are two types of Dolby Enabled Speakers: one type is designed to be placed on top of other speakers such as front speakers and surround speakers, and the other type is designed to be integrated with normal speakers. Dolby Enabled Speakers placed with their diaphragms facing toward the ceiling create higher effect in the Dolby Atmos and Dolby Surround listening modes by providing sounds echoing off the ceiling. You can select ① or ② on the unit. For connection with the unit, use the SPEAKERS BACK/HEIGHT terminals.

When playing Dolby Atmos, the speakers required depend on how you have setup your back speakers or height speakers. The following shows combinations of speakers.

① Required ② Optional ③ Connection of a subwoofer is optional.

Step 1: Connections
ZONE B Connection

You can listen to audio in a room (called ZONE B) other than ZONE A (the room where this unit is located).

Instructions on how to connect speakers

Cut and remove the plastic coating from the end of the speaker cable, twist the core and connect it to the terminal. Be sure to make correct connection between the unit's jacks and speaker's jacks (+ to + and - to -) for each channel. If connection is wrong, a bass sound may become poor due to reverse phase. The subwoofer jack supports connection of a subwoofer with built-in power amplifier. Set the cut-off filter selection switch of the subwoofer to DIRECT. If the subwoofer does not have a cut-off filter selection switch but has a cut-off frequency adjusting dial, turn it to the maximum frequency. If your subwoofer does not have built-in power amplifier, you can connect a power amplifier between the unit and the subwoofer.

- The speaker setting is 7.1 channels at the time of purchase. You can change it manually or by using automatic speaker setting.
- Short-circuiting the + cable and - cable or contacting the cable core to the rear panel of the unit may cause failure. Also do not connect two or more cables to one speaker terminal or one speaker to several terminals.

When using commercially available banana plugs:
tighten the speaker terminals to the end and then insert the banana plugs. Do not insert the core of speaker cable directly into the hole for banana plug of speaker terminal. (North American models)
Step 2: Setting Up

**Operation**: Use the remote controller of this unit to operate the menus shown on the TV screen. To display the guidance, you need to make HDMI connection between the unit and TV. Select the item with the cursor buttons of the remote controller and press ENTER to confirm your selection. To return to the previous screen, press RETURN.

1. **Turning the Power On**

Connect the power cord to the outlet (★). Press ON/STANDBY on the main unit or RECEIVER on the remote controller to turn the unit on or to standby mode.

2. **Making Automatic Speaker Setting**

   The AccuEQ Room Calibration function, our proprietary technology, measures the test tone coming from each speaker with the supplied speaker setup microphone, setting of the number of speakers, volume level, each speaker’s optimum crossover frequencies, and distance from the primary listening position, and also enables correction of distortion caused by the acoustic environment of the room.

   - You cannot return to the previous screen during speaker setup, even if you press RETURN.

   - When the unit is turned on, a large instantaneous current may flow affecting functionality of the computer and other devices. It is recommended to use a separate outlet from that for the computer or such other sensitive devices.

   - Taiwanese models include removable power cords. Connect the power cord to AC INLET of the unit and then connect to the outlet. Always disconnect the outlet side first when disconnecting the power cord.

   - You cannot return to the previous screen during speaker setup, even if you press RETURN.

   - Measurement will not be possible if the microphone is held by hand. Measurement is not possible if headphones are being used.

   - The subwoofer sound may not be detected since it is extremely low frequencies. Set the subwoofer volume to around the half of its maximum volume and make its frequency to the maximum level.

   - Measurement may be interrupted if there is ambient noise or radio frequency interference. Close the window and turn off the home appliance and fluorescent light.

1. Place the speaker setup microphone. Before starting the procedure, refer to the figure and place the supplied speaker setup microphone at the measurement position ★.

2. Connect the speaker setup microphone to the SETUP MIC jack of the unit.

---

En-10
3. Select the settings for the connected speakers, the type of the height speakers, and other appropriate settings.

When the screen above is displayed, set the items with the cursor buttons on the remote controller. Refer to the on-screen diagram for “Speaker Channels”, which changes each time a different number of channels is selected. When all the items have been set, press ENTER on the remote controller. After that, follow the guidance displayed on the TV screen to operate the unit.

- Refer to the content of an item, which appears on the lower left of the screen when the cursor is on the item.

4. The test tones sound from the connected speakers and automatic speaker setting starts. Measurement will be made three times or more for each speaker. It takes several minutes to be completed. Keep the room as quiet as possible during measurement. If any of the speakers do not produce the test tone, check the room as quiet as possible during measurement. If any of the speakers do not produce the test tone, check the room as quiet as possible during measurement.

- During measurement, each speaker outputs the test tones at a high volume. Be careful of sound leak that may disturb your neighbors, or be careful not to frighten young children.
- To cancel measurement on the way, disconnect the microphone plug.

5. When the measurement is completed, the measurement result is displayed.

Press ENTER on the remote controller to check the settings. Press ENTER with “Save” selected. Select “On” in the next screen and press ENTER on the remote controller.

- You should normally select “On (All Channels)”, and to disable just the front speakers, you should select “On (Except Front Left/Right)”. If there is an error message, follow the on-screen instruction to remove the error cause.

6. When “Please unplug setup microphone.” is displayed, disconnect the microphone.

2. Select “5. Hardware” with the cursor and press ENTER.

3. Select “HDMI” with the cursor and press ENTER.

4. Select “HDMI CEC (RIHD)” with the cursor and select “On”.

- When setting is complete, press SETUP to close the menu screen.

HDMI CEC (RIHD)

The following linked operations are possible with connected equipment when the CEC function is enabled.

- Turning the TV to standby mode will turn the unit to standby mode.
- On the TV side, it is possible to set whether to output audio from the speakers connected to the unit or from the TV’s speakers.
- Starting playback of a CEC compliant player/recorder will automatically switch the unit’s input to the HDMI input of the player/recorder. If the unit is in standby mode, it will automatically be turned on.

It is also possible to control the connected CEC compliant equipment with the remote controller of the unit. For details, see the Advanced Manual.

- RIHD is a name for the linked system function of Onkyo’s CEC compliant products.

1. After pressing RECEIVER, press SETUP on the remote controller.

HDMI Standby Through

The function allows transmission from players to the TV even if the unit is in standby. Setting the HDMI CEC (RIHD) setting mentioned above to “On” enables this setting automatically.

- Power consumption in standby mode increases when the HDMI Standby Through function is enabled.

ARC (Audio Return Channel)

Simple connection to the ARC compatible TV using a single HDMI cable allows to listen to the TV audio signals from the speakers connected to the unit. Setting the HDMI CEC (RIHD) setting mentioned above to “On” enables the “Audio Return Channel” setting automatically.

Audio output of connected players

To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to “Bitstream output” on the connected Blu-ray Disc Player or other device. Depending on the settings on the Blu-ray Disc Player, there may be cases when Dolby TrueHD, Dolby Atmos, and DTS-HD Master Audio is not output according to the format of the source.

In this case, in the Blu-ray Disc Player settings try setting “BD video supplementary sound” (or secondary sound) to “Off”. Change the listening mode after changing the setting to confirm.
Step 3: Playing Back

1. Basic Operations

When using the remote controller to operate the AV receiver: The remote controller of this unit has the remote mode function for controlling other devices. You cannot control this unit when the remote controller is in the remote mode other than RECEIVER mode (for controlling this unit). Be sure to press RECEIVER to select the RECEIVER mode before starting operation.

1. Turning the power on.
   Press 1 RECEIVER on the remote controller to turn the power on.
   ● Switch the input on the TV to that assigned to the unit. Use the TV’s remote controller.

2. Select the input on the unit.
   Press the 2 INPUT SELECTOR for the player you want to listen to. Press TV to listen to the TV’s sound. You can also use the input selector buttons on the main unit.
   ● Input will automatically be selected if the TV or player is CEC compliant and connected to the unit with HDMI cable.

3. Select the desired listening mode.
   After pressing 1 RECEIVER, press the 7 listening mode buttons to switch the mode so that you can enjoy different listening modes.

4. Adjust the volume with 8 VOL.

Part names and functions of the remote controller

1. RECEIVER button: Turns the unit on or into standby mode.
2. REMOTE MODE/INPUT SELECTOR buttons: Switch the input to be played. Furthermore, by registering a particular remote control code to a button, you can switch the remote control mode to operate other equipment by pressing that button.
3. MEMORY button: Registers a radio station.
4. TUN MODE button: Switches the tuning mode.
5. Cursor buttons and ENTER button: Move the cursor and confirms the selection.
6. SETUP button: Displays the screen for making various settings for this unit.
7. Listening mode buttons: Allow you to select the listening mode.
   MOVIE/TV button: You can select a listening mode suitable for movies and TV programs.
   MUSIC button: You can select a listening mode suitable for music.
   GAME button: You can select a listening mode suitable for games.
   STEREO button: You can select a listening mode for stereo and all channel stereo sources.
   ● For details on the listening modes, see the Advanced Manual.
8. DIMMER button: Switches the brightness of the display.
9. ZONE A/B button: For use when the unit is connected with speakers in a separate room and sound is played there.
10. MUSIC OPT button: Turns on/off the MUSIC OPTIMIZER function that improves the quality of the compressed audio.
11. RECEIVER button: Switches the remote controller to the mode for operating this unit.
12. MUTING button: Temporarily mutes audio. Press again to cancel muting.
13. VOLUME buttons: Allow you to adjust the volume. This button also cancels the muting.
14. RETURN button: Returns the display to the previous state.
15. Q button: Displays the Quick Setup menu that allows you to quickly access the frequently used setting items including sound quality adjustment.
16. DISPLAY button: Switches the information on the display.
2 Bluetooth

You can wirelessly enjoy music files stored in a smartphone or other Bluetooth-enabled device. The coverage area is 48 feet (15 meters).

- The Bluetooth-enabled device needs to support the A2DP profile.
- Note that connection is not always guaranteed with all Bluetooth-enabled devices.

Pairing

Pairing is necessary when connecting the Bluetooth-enabled device for the first time. Before starting the procedure, learn how to enable the Bluetooth setting function and to connect with other devices on the Bluetooth-enabled device.

1. Press BLUETOOTH on the remote controller.
   The unit begins pairing and "Now Pairing..." is displayed.

2. While "Now Pairing..." is on the display, complete connection on the Bluetooth-enabled device in the nearby area within about 1 minute.
   If the name of this unit is displayed on the Bluetooth-enabled device's display, select this unit. Paring will end after a short time.
   - If a password is requested, enter "0000".
   - You can pair with another Bluetooth-enabled device by pressing and holding the BLUETOOTH button until "Now Pairing..." is on the display. This unit can store the data of up to 8 paired devices.

Playing Bluetooth-enabled devices

If the unit is on and the Bluetooth-enabled device is connected, the input will be automatically switched to BLUETOOTH. Play music in this state.

For details on using the remote controller for these operations, see the Advanced Manual.

- Due to the characteristics of Bluetooth wireless technology, the sound produced on this unit may slightly be behind the sound played on the Bluetooth-enabled device.
- The on-screen displays are not displayed when the OSD language is set to Chinese. Operate by confirming the display on the main unit (European, Australian, Taiwanese, and Asian models).

3 AM/FM Radio

The Basic Manual explains the method using automatic tuning. For manual tuning, see the Advanced Manual.

1. Press TUNER on the remote controller several times to select either "AM" or "FM".
2. Press TUN MODE so that the "AUTO" indicator on the display lights.
3. Press the ▲/▼ cursor buttons.
   The automatic tuning to a radio station starts. Searching stops when one is tuned. When tuned into a radio station, the "FM STEREO" indicator lights if the radio station is an FM radio station.
   - Alternatively you can press TUNING on the main unit.

Registering a radio station:

You can register up to 40 of your favorite AM/FM radio stations.

1. Tune into the AM/FM radio station you want to register.
2. Press MEMORY on the remote controller so that the preset number on the display flashes.
3. Press CH ▼/▲ several times to select a number between 1 and 40 while the preset number is flashing (about 8 seconds).
   - Alternatively you can press PRESET on the main unit.
4. Press MEMORY again to register the station.
   When registered, the preset number stops flashing. To
**Step 3: Playing Back**

- **Multi-zone**
  
  You can listen to audio in a room (called ZONE B) other than ZONE A (the room where this unit is located). You can play in both ZONE A and ZONE B or just in ZONE B.

  **Press ZONE A/B on the remote controller several times to select the zone.**
  
  Either “A” or “B” lights on the display of the main unit to indicate which zone is currently selected.

  - Alternatively you can press ZONE A or ZONE B on the main unit.
  - The volume of ZONE B is the same as the volume set for ZONE A.
  - It is not possible to listen to different sources in ZONE A and ZONE B.
  - The listening mode is fixed to All Ch Stereo when playing in ZONE B. Furthermore, no sound will be output from the back speakers and height speakers in ZONE A.

- **Quick Setup Menu**
  
  You can perform common settings on the TV screen while playing.

  1. **Press Q on the remote controller.**
     
     The Quick Setup menu is displayed on the connected TV’s screen.

  2. **Select the item with the cursors on the remote controller and then press ENTER.**
     
     - To return to the previous screen, press RETURN.

  3. **Select the setting with the cursors of the remote controller.**

     - **Listening Mode**: Select the listening mode from the categories of “MOVIE/TV”, “MUSIC” and “GAME”. After selecting the Listening Mode, press ENTER button to confirm.
       
       - It cannot be set when audio is played from the TV’s speakers.

     - **Audio**: You can perform various audio settings including audio quality and speaker level adjustment.
       
       - You cannot select this item when audio is output from the TV’s speakers.

       - **Bass, Treble**: Adjust volume of the front speaker.
         
         - It cannot be set if the listening mode is Direct.

       - **Phase Matching Bass**: Suppress phase shift in the midrange to enhance bass sound. Thus smooth and powerful bass sound can be obtained.
         
         - It cannot be set if the listening mode is Direct.

       - **Center Level, Subwoofer Level**: Adjust the speaker level while listening to the sound. The adjustment you made will be reset to the previous status when you turn the unit to standby mode.
         
         - Changes may not be possible depending on the speaker settings.
Step 3: Playing Back

- This setting is not possible during MUTING or when using headphones.

A/V Sync: If the video is behind the audio, you can delay the audio to offset the gap. Different settings can be set for each input selector.
- It cannot be set if the listening mode is Direct.

AccuEQ Room Calibration: Enable or disable the settings made by automatic speaker setting. To enable them, you should normally select "On (All Ch)", and to disable just the front speakers, you should select "On (ex. L/R)". The setting can be separately set to each input selector.
- This setting cannot be selected if the automatic speaker setting has not been performed.
- It cannot be set if headphones are connected or the listening mode is Direct.

Music Optimizer: Improve the quality of the compressed audio. Playback sound of lossy compressed files such as MP3 will be improved. The setting can be separately set to each input selector.
- The setting is effective in the signals of 48 kHz or less. The setting is not effective in the bitstream signals.
- It cannot be set if the listening mode is Direct.

Late Night: Make small sounds to be easily heard. It is useful when you need to reduce the volume while watching a movie late night. You can enjoy the effect only with Dolby Digital, Dolby Digital Plus, and Dolby TrueHD input sources.
- Turning the unit to standby mode will set the setting to "Off". In case of Dolby TrueHD, the setting will be set to "Auto".
- If "Loudness Management" is set to "Off", this function is not available when playing Dolby Digital Plus or Dolby TrueHD.

Cinema Filter: Adjust the soundtrack that was processed to enhance its treble, in order to make it suitable for home theater.
- This function can be used in the following listening modes: Dolby Digital, Dolby Digital Plus, Dolby TrueHD, Multichannel, DSD, DTS, DTS-ES, DTS Neo:6 Cinema, DTS 96/24, DTS-HD High Resolution Audio, DTS-HD Master Audio, DTS Express.

Center Spread: Adjust the width of the sound field of the front channel when playing in the Dolby Surround listening mode.

To spread the width of the sound field to the left and right, set to "On". To concentrate sound in the center, set to "Off".
- Depending on the speaker settings, this becomes "Off".

Information:
- Audio: Displays the audio input source, format, number of channels, sampling frequency, listening mode, and number of output channels.
- Video: Displays information such as the video input source, resolution, color space, color depth, 3D information, Aspect and output.
- Tuner: Displays information such as the band, frequency, and preset number. This is displayed only when "TUNER" is selected as the input source.

Other useful functions

6 Other useful functions

To adjust the sound quality
It is possible to enhance or moderate the bass and treble of front speakers. Press TONE on the main unit several times to select the desired setting from "Bass", "Treble" and "Phase Matching Bass", and adjust with +/-.
- It cannot be set if the listening mode is Direct.
- "Bass": Allows you to enhance or moderate the bass.
- "Treble": Allows you to enhance or moderate the treble.
- "Phase Matching Bass": Allows you to keep the clear midrange and effectively enhance the bass.

Checking the Input Format
Press DISPLAY on the remote controller several times to switch the display of the main unit in order of:

- Input source & volume
- Listening mode
- Signal format
- Sampling frequency
- Input signal resolution

- If "Dolby D 5.1" is displayed in Signal format, the Dolby Digital 5.1 ch signals are being input. When listening to AM/FM radio, the band, frequency and preset number are displayed.

Playing Audio and Video from Separate Sources
It is possible to play audio and video from different sources. For example, you can play audio from the CD player and video from the BD/DVD player. In this case, press BD/DVD and then CD. Then start playback on the BD/DVD player and CD player. This function is effective when an input with audio only has been selected (CD, TUNER or BLUETOOTH). (*)

(*): When BLUETOOTH is selected, press MODE on the remote controller.
Others

Troubleshooting

Before starting the procedure
Problems may be solved by simply turning the power on/off or disconnecting/connecting the power cord, which is easier than working on the connection, setting and operating procedure. Try the simple measures on both the unit and the connected device. If the problem is that the video or audio is not output or the HDMI linked operation does not work, disconnect/connecting the HDMI cable may solve it. When reconnecting, be careful not to wind the HDMI cable since if wound the HDMI cable may not fit well. After reconnecting, turn off and on the unit and the connected device.

The AV receiver turns off unexpectedly.
- The AV receiver will automatically enter standby mode when Auto Standby or Sleep Timer is set and launched.
- The protection circuit may have been activated. If this is the case, when you turn the unit on again, “AMP Diag Mode” will appear on the main unit’s display. The unit will then enter a mode that detects abnormal conditions. If no problems are detected, “AMP Diag Mode” will disappear and the unit will return to a normal state. If “CHECK SP WIRE” appears on the display, the speaker cables may be short-circuited. Turn the unit off, and check to see if the cable core of any of the speaker cables is in contact with that of another speaker cable or with the rear panel. After that, turn the unit on again. If “NG” appears, unplug the power cord immediately and contact your Onkyo dealer.

There’s no sound, or it’s very quiet.
- A wrong input selector button has been selected. Select a correct input for the player. Also check that muting is not on.
- Not all listening modes use all speakers.

There’s no picture.
- A wrong input selector button has been selected.
- To display video from the connected player on the TV screen while the unit is in standby, you need to enable HDMI Standby Through function.
- When the TV image is blurry or unclear, power cord or connection cables of the unit may have interfered. In that case, keep distance between TV antenna cable and cables of the unit.

Video and audio are out of synch.
- Video may be delayed relative to audio depending on the settings and connections with your TV. Adjust in “Step 3: Playing Back”, “5 Quick Setup Menu”, “A/V Sync”.

Cannot play digital surround.
- To enjoy digital surround sound including Dolby Digital and DTS, audio output should be set to “Bitstream output” on the connected Blu-ray Disc Player or other device.

Cannot output audio such as Dolby Atmos according to the format of the source.
- If you cannot output audio according to the format of the source (Dolby TrueHD, Dolby Atmos, DTS-HD Master Audio, etc.), in the Blu-ray Disc Player settings try setting “BD video supplementary sound” (or secondary sound) to “Off”. Change the listening mode for each source after changing the setting to confirm.

HDMI control does not function correctly.
- Set the CEC link function of the unit to on. It is also necessary to make the HDMI linked system setting on the TV. See the TV’s instruction manual for details.

Rebooting the unit
Resetting the unit to the status at the time of shipment may solve the problem. If the measures above do not solve the problem, reset the unit with the following procedure. If you reset the unit status, your preferences will be reset to the defaults. Note them down before starting reset.

1. While holding down CBL/SAT, press ON/STANDBY on the main unit (note that step 2 must be performed with this button pressed down)
2. Press ON/STANDBY on the main unit. (“Clear” appears on the display and the unit returns to standby.)
- Do not unplug the power cord until “Clear” disappears from the display.

How to reset the remote controller:
1. While holding down RECEIVER on the remote controller, press Q until the remote indicator stays lit (about 3 seconds).
2. Within 30 seconds, press RECEIVER again.

Remote indicator

Specifications

Amplifier Section
Rated Output Power (North American)
With 8 ohm loads, both channels driven, from 20-20,000 Hz; rated 65 watts per channel minimum RMS power, with no more than 0.7% total harmonic distortion from 250 milliwatts to rated output.
Surround Mode Output Power (+)
(6 ohms, 1 kHz THD 0.9%) 115 W per channel
* Reference output for each speakers.
Depending on the source and the listening mode settings, there may be no sound output.
Rated Output Power (Others)
7 ch × 100 W at 6 ohms, 1 kHz, 1 ch driven of 1% (IEC)
Maximum Effective Output Power
7 ch × 120 W at 6 ohms, 1 kHz, 1 ch driven (JEITA) (Asian)
Dynamic Power (+)
IEC60268-Short-term maximum output power
160 W (3 Ω, Front)
125 W (4 Ω, Front)
85 W (8 Ω, Front)
THD+N (Total Harmonic Distortion+Noise)
0.08% (20 Hz - 20 kHz, half power)
Input Sensitivity and Impedance (Unbalance)
200 mV/47 kΩ (LINE, 1 kHz 100 W/8 Ω)
Rated RCA Output Level and Impedance
1 V/470 Ω (SUBWOOFER PRE OUT)
Frequency Response
10 Hz - 100 kHz +/- 1 dB, –3 dB (Direct mode)
Tone Control Characteristics
+10 dB, 20 Hz (BASS)
+10 dB, 20 kHz (TREBLE)
Signal to Noise Ratio
100 dB (LINE, IHF-A)
Speaker Impedance
6 Ω - 16 Ω

Video Section
Signal level
1.0 Vp-p/75 Ω (Component Y)
0.7 Vp-p/75 Ω (Component Pb/Cb, Pr/Cr)
1.0 Vp-p/75 Ω (Composite)
Maximum resolution supported by component video
480i/576i

Tuner Section
FM Tuning Frequency Range
87.5 MHz - 107.9 MHz (North American and Taiwanese)
87.5 MHz - 108.0 MHz, RDG (Others)
AM Tuning Frequency Range
520/1,530 kHz - 1611/1710 kHz
Preset Channel
40

Bluetooth Section
Communication system
Bluetooth Specification version 2.1 +EDR (Enhanced Data Rate)
Maximum communication range
Line of sight approx. 15 m (+)
Frequency band
2.4 GHz band
Modulation method
FHSS (Freq Hopping Spread Spectrum)
Compatible Bluetooth profiles
A2DP 1.3 (Advanced Audio Distribution Profile)
AVRCP 1.5 (Audio Video Remote Control Profile)
Supported Codec
SBC
Transmission range (A2DP)
20 Hz - 20,000 Hz (Sampling frequency 44.1 kHz)
* The actual range will vary depending on factors such as obstacles between devices, magnetic fields around a microwave oven, static electricity, cordless phone, reception sensitivity, antenna’s performance, operating system, software application, etc.

General
Power Supply
AC 120 V, 60 Hz (North American and Taiwanese)
AC 220 - 240 V, 50/60 Hz (Others)
Power Consumption
4.3 A (North American and Taiwanese)
420 W (Others)
0.15 W (Stand-by, North American and Taiwanese)
0.3 W (Stand-by, Others)
55 W (No-sound)
Dimensions (W × H × D)
435 mm × 160 mm × 328 mm
17-1/8" × 6-5/16" × 12-15/16"
Weight
7.8 kg (17.2 lbs.) (North American and Taiwanese)
8.0 kg (17.6 lbs.) (Others)

HDMI
Input
BD/DVD, CBL/SAT, GAME 1, STRM BOX
Output
HDMI OUT (to TV)
Video Resolution
4K 60 Hz (RGB/YCbCr 4:4:4/YCbCr 4:2:2, 24 bit)
Audio Format
Dolby Atmos, Dolby TrueHD, Dolby Digital Plus, Dolby Digital, DTS-HD Master Audio, DTS-HD High Resolution Audio, DTS 96/24, DTS-ES, DTS Express, DSD, Multichannel PCM (up to 8ch)
Supported
3D, Audio Return Channel, Deep Color, x.v.Color™, LipSync, CEC, 4K, Extended Colorimetry (sYCC601, Adobe RGB, Adobe YCC601), Content Type, 3D Dual View, 21:9 Aspect Ratio Video Format

Precautions

For European Models

Declaration of Conformity

We declare, under our sole responsibility, that this product complies with the standards:

- Safety
- Limits and methods of measurement of radio disturbance characteristics
- Limits for harmonic current emissions
- Limitation of voltage changes, voltage fluctuations and flicker
- RoHS Directive, 2011/65/EU

Hereby, Onkyo Corporation, declares that this TX-SR444 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Onkyo Corporation.

Declaration of Conformity

For European Models

Prin prezenta, Onkyo Corporation, declară că aparatul TX-SR444 este în conformitate cu cerințele esențiale și cu alte prevederi pertinente ale Directivei 1999/5/CE.

Onkyo Corporation týmto vyhlásuje, že TX-SR444 a spíše základné požiadavky a všetky príslušné ustanovení Smernice 1999/5/ES.

Onkyo Corporation izjavlja, da je ta TX-SR444 v skladu z bistvenimi zahtevami in drugimi relevantnimi določili direktive 1999/5/ES.

Onkyo Corporation vakuutaa tätä että TX-SR444 tyyppinen laite on direktiivin 1999/5/EY oleellisten vaatimusten ja siihen koskevien direktiivin muiden ehtojen mukainen.

Hiermed förklarar Onkyo Corporation att denna TX-SR444 följer de väsentliga kraven och andra relevanta stadgar i Direktiv 1999/5/EC.

Agreement of Onkyo Corporation that this TX-SR444 is in conformity with the essential requirements and other relevant provisions of the Directive 1999/5/EC.

Onkyo Corporation prohlašuje tedy, že TX-SR444 vyhovuje základním požadavkům a všeobecně platným ustanovením směrnice 1999/5/ES.

Onkyo Corporation erklärt herved, at denne TX-SR444 er i overensstemmelse med viesenkrav og andre relevante bestemmelser i direktiv 1999/5/EC.

Onkyo Corporation potvrzuje, že TX-SR444 je ve shodě s osnovnimi zahtevami in ostalimi relevantnimi odredbami Direktive 1999/5/EC.

Prin prezenta, Onkyo Corporation, declară că aparatul TX-SR444 este în conformitate cu cerințele esențiale și cu alte prevederi pertinente ale Directivei 1999/5/CE.

Onkyo Corporation týmto vyhlásuje, že TX-SR444 a spíše základné požiadavky a všetky príslušné ustanovení Smernice 1999/5/ES.

Onkyo Corporation izjavlja, da je ta TX-SR444 v skladu z bistvenimi zahtevami in drugimi relevantnimi določili direktive 1999/5/ES.

Hiermed förklarar Onkyo Corporation att denna TX-SR444 följer de väsentliga kraven och andra relevanta stadgar i Direktiv 1999/5/EC.

Hierbij verklaart Onkyo Corporation dat het toestel TX-SR444 in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EC.

Con la presente, Onkyo Corporation, dichiara che questo TX-SR444 è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti dalla direttiva 1999/5/CE.

Por la presente, Onkyo Corporation, declara que este TX-SR444 cumple con los requisitos esenciales y otras exigencias relevantes de la Directiva 1999/5/EC.

Supplied Accessories

Indoor FM antenna --- (1)
AM loop antenna --- (1)
Remote controller (RC-896M) --- (1)
Batteries (AA/R6) --- (2)
Power cord (Taiwanese models) --- (1)
Speaker setup microphone --- (1)

* The number in parenthesis indicates the quantity. On packaging, the letter at the end of the product name indicates the color.

How to use the remote controller

Remote control sensor
AV Receiver
Batteries (AA/R6)

* If you do not use the remote controller for a long time, remove the batteries to prevent leakage.
* Note that keeping consumed batteries inside may cause corrosion resulting in damage of the remote controller.
